

**Australian Pesticides &
Veterinary Medicines Authority**

**PERMIT TO ALLOW EMERGENCY USE
OF A REGISTERED AGVET CHEMICAL PRODUCT**

PERMIT NUMBER -PER10722

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 10 APRIL 2008 TO 30 SEPTEMBER 2009.

Permit Holder:

LIQUID FERTILISER PTY LTD T/A AGRICHEM
2-4 CHETWYND ST
LOGANHOLME QLD 4129

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Products to be used:

All registered products containing either:

400 g/L, 600 g/L, 620 g/L OR 625 g/L PHOSPHOROUS ACID as their only active constituent.

Directions for Use:

Crop	Disease	Rate
Avocado	Root rot (<i>Phytophthora cinnamomi</i>)	<u>400 g/L products</u> Apply 1250 mL/100L <u>600 g/L products</u> Apply 825 mL/100L <u>620 g/L & 625 g/L products</u> Apply 800 mL/100L

Critical Use Comments:

DO NOT apply more than 5 applications per year with a minimum re-treatment interval of 3 weeks between applications.

Apply as a foliar spray by knapsack or air-blast sprayer.

Apply high volume spray to the point of run-off (i.e. 2000-3000 L/ha for mature trees).

Withholding Period:

Not required when used as directed.

Jurisdiction:

ALL States

Additional Conditions:

This Permit provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit.

RESIDUES:

To allow produce from treated plants to be supplied or otherwise made available for human consumption, the APVMA has established a temporary Maximum Residue Limit of 500 mg/kg for phosphorous acid in avocado. This limit applies only to produce marketed and consumed in Australia. Therefore, if treated produce is to be exported, due account should be taken of the residue definition and residue limits/import tolerances of importing countries and that any residues must not exceed those requirements of the importing country.
